

Respected DHS Families,

The English Department happily welcomes back all students to a wonderful academic year filled with lots of achievements and purposeful activities. The English Department's team continuously works hard to upgrade and develop its program based on the school's Vision and Mission in order to meet the needs of our growing generations in the twenty-first century.

The curriculum at DHS has been assessed and reviewed against Common Core International Standards http://www.corestandards.org/wp-content/uploads/ELA_Standards1.pdf It is ensured that our students study age level material and the curriculum fulfills these standards through yearly horizontal and vertical mapping.

Furthermore, we proudly announce the Math and Science as official subjects within the English Program of Dar Alhanan Schools. Hence they are both graded subjects which will be added to the overall scores of English throughout the year from Grade 7 to 12.

The English Department Team works collaboratively and harmoniously to facilitate a well-designed English program. The team comprises of qualified and experienced staff members who are highly communicative and open to continuous development. These professionals' first goal is to support our students' learning in every essential aspect.

Finally, we truly wish our students fruitful and happy learning experiences!
